SAUNA

La sauna finlandese è un rito che dal Nord Europa si è diffuso in tutto il mondo. Nella sauna il calore può raggiungere temperature fino ai 100°C, ma grazie alla bassa umidità (20-30%) si trasforma in un piacevole abbraccio che rilassa la muscolatura e favorisce la depurazione dell'organismo.

From its Scandinavian beginnings, the Finnish sauna has conquered the whole world. The heat in a sauna can reach temperatures up to 100°C but the low humidity (20-30%) transforms this into a pleasant embrace that relaxes the muscles and stimulates bodily purification.

20% > 30%

85°C > 100°C

BIOSAUNA

La Biosauna è una sauna con livelli di temperatura contenuti tra i 50 e i 60°C e un'umidità di circa 60-70%. Grazie al vaporizzatore integrato, impostando la temperatura preferita, la stufa Bio creerà l'equilibrio perfetto fra calore ed umidità.

The Bio-sauna is a sauna whose temperature ranges from 50 to 60°C with humidity between 60-70%. The built-in vaporiser allows you to set your preferred temperature and the Bio heater creates the perfect balance between heat and humidity.

50°C > 60°C

60% > 70%

HAMMAM

Al contrario della sauna, nel bagno turco l'umidità raggiunge il 100% e le temperature non superano i 48°C. L'azione contemporanea del vapore e del calore controllato aiuta la circolazione sanguigna linfatica sciogliendo le tossine e favorendone l'espulsione.

In contrast to the sauna, in the steam bath the humidity reaches 100% and the temperature never exceeds 48°C.

The combined action of the steam and the controlled heat assists the blood and lymph circulation system, dissolving toxins and favouring their expulsion.

35°C > 48°C

90% > 100%

I prodotti Effe possono essere adattati a qualunque spazio: costruisci la tua personale area di benessere, ideata su misura per sfruttare al meglio ogni ambiente disponibile. Effe è in grado di realizzare progetti che prevedono la combinazione di saune, hammam, zone relax, bagno e doccia: il centro benessere ideale.

Effe products can be adapted to fit any space: create your own personal wellbeing area, tailor-made to make the very best use of the environment. Effe can produce designs combining saunas, Hammams, relaxation zones, baths and showers to create the perfect spa.

Yoku SH

Design: _____

Marco Williams Fagioli
(Zup Design)

L'elemento distintivo del sistema Yoku SH è rappresentato dalle grandi vetrate arretrate del prospetto frontale in vetro fumé bronzo e dagli elementi architettonici verticali in legno naturale che suggeriscono l'immersione in una foresta di alberi, creando un'elegante sensazione di intimità durante il bagno di calore.

> All'interno il comfort è esaltato dalla doppia panca di uguali dimensioni della sauna e dalla seduta unica, molto profonda, dell'hammam.

> Il modulo libreria può essere utilizzato anche come elemento esterno da affiancare alle vetrate creando un filtro utile alla realizzazione di spazi intimi e fortemente personalizzabili.

The key features of the Yoku SH system are the large recessed glass wall in bronze smoked glass along the front and the vertical elements in natural wood which create the feeling of being outdoors, in the middle of a forest, bringing elegance and privacy to the heat experience.

> In the sauna comfort is provided by two benches which are both the same size and in the Hammam by one single, very deep seat.

> The bookcase can also be used as a separate element outside the spa, placing it next to the glass panels where it can act as a filter to create private, highly personalised spaces.

< 1

2 >

Yoku SH Shelf
Large glass wall along the front with an open
bookcase and shelving in pickled metal.

Yoku SH Door
Large glass panels with a solid wood door and handle that runs full height add elegance to Yoku SH Door model.

Yoku SH Glass
This model is flooded with light thanks to the large glass panels.
Yoku SH Glass has no vertical shelving elements but a double glass door
and takes the feeling of transparency to new heights.

Yoku SH is a warm and welcoming wellbeing space with an essential, well-proportioned and minimal design.

Yoku SH Shelf
Yoku bookcase with its vertical elements in natural wood confers elegance and privacy to the heat experience.

FRANÇAIS

Yoku SH

L'élément distinctif du système Yoku SH est représenté par les grandes cloisons vitrées écartées de la façade avant en verre bronze fumé et par les éléments architecturaux verticaux en bois naturel qui suggèrent une immersion dans une forêt d'arbres, créant ainsi une élégante sensation d'intimité pendant le bain de chaleur.

Caractéristiques :

À l'intérieur, le confort est assuré par la double banquette de même taille du sauna et par le siège unique, très profond, du hammam.

Le module de la bibliothèque peut également être utilisé comme élément extérieur à placer à côté des cloisons vitrées, créant ainsi un filtre utile pour la création d'espaces intimes et hautement personnalisables.

DEUTSCH

Yoku SH

Das charakteristische Element des Yoku SH-Systems sind die großen zurückversetzten Verglasungen aus bronzefarbenem Fumé-Glas auf der Vorderseite und die vertikalen Architekturelemente aus Naturholz, die das Eintauchen in einen Wald suggerieren und während des Wärmebads ein elegantes Gefühl von Intimität erzeugen.

Beschreibung:

Die Innenräume bieten größten Komfort dank der Doppelbank in der Sauna und der gleichgroßen sehr tiefen Sitzfläche des Hamams.

Das Regalmodul kann auch außen neben den Verglasungen positioniert werden und damit als Blickschutzfilter für die Schaffung intimer und stark individualisierter Räume dienen.

ESPAÑOL

Yoku SH

El elemento diferencial del sistema Yoku SH está representado por las grandes paredes de vidrio alejadas del frontal en vidrio ahumado bronce y por los elementos arquitectónicos verticales de madera natural que sugieren la inmersión en un bosque de árboles, creando una elegante sensación de intimidad durante el baño de calor.

Características:

En el interior la comodidad se resalta con el doble banco de igual tamaño de la sauna y con el asiento único, muy profundo, del hammam.

El módulo librería se puede utilizar también como elemento externo junto a las paredes de vidrio creando un filtro útil para realizar espacios íntimos y muy personalizables.

РУССКИЙ

Yoku SH

Характерной особенностью системы Yoku SH являются широкие углубленные стеклянные секции дымчато-бронзового цвета, которые вместе с вертикальными архитектурными элементами из натурального дерева создают приятное ощущение тепла и единения с природой, наподобие сеанса лесотерапии.

Характеристики:

Два одинаковых полка в сауне и одно глубокое сиденье в хаммаме.

Стеллажный модуль может также устанавливаться в качестве внешнего элемента наряду со стеклянными секциями, образуя элегантное и легко персонализируемое ограждение.

中文

Yoku SH

Yoku SH水疗系统的主要特色在于大片的古铜色烟熏色玻璃的内陷式玻璃墙，加上天然木材的正面和垂直元素，打造出慢慢的户外感觉，仿佛置身于森林之中，为这一水疗体验注入优雅氛围和私密保护。

特点:

在桑拿房中，这种舒适感来自两个相同尺寸的长凳，而在汗蒸房中，仅有一个较深的座椅。

书架不仅可以作为水疗房外部的隔断元素，紧贴玻璃面板以便作为屏风，营造出高度个性化的私密空间。

Yoku S

Design:

Marco Williams Fagioli
(Zup Design)

Pur avendo un design essenziale, equilibrato e rigoroso, Yoku S è accogliente, calda e naturale. L'ampia vetrata frontale è scandita all'esterno da elementi verticali in legno naturale che rendono lo spazio più intimo e diventano contemporaneamente elementi portanti di ripiani a giorno che dialogano con l'esterno.

> Tre diverse soluzioni estetiche declinabili in tre diverse essenze di legno rendono il progetto aperto a qualsiasi proposta progettuale.

> Il volume della stufa è integrato nella panca più bassa offrendo così un'immagine di grande linearità formale.

Yoku's essential, well-balanced minimalist design is also warm, welcoming and natural. The large glass panel at the front features vertical elements in natural wood on the outside, which make the space inside more private and provide shelving that is open to the external environment.

> Three different designs available in three different types of wood mean the sauna meets all aesthetic needs.

> The heater is built into the lowest bench thus displaying an uncluttered, linear effect.

FRANÇAIS

Yoku S

Malgré son design essentiel, équilibré et rigoureux, Yoku S est accueillant, chaud et naturel. La grande cloison vitrée frontale est constituée à l'extérieur par des éléments verticaux en bois naturel qui rendent l'espace plus intime, devenant en même temps des éléments porteurs de surfaces d'appui visibles qui dialoguent avec l'extérieur.

Caractéristiques :

Trois diverses solutions esthétiques déclinables en trois diverses essences de bois permettent de réaliser toutes propositions conceptuelles. Le volume du poêle est intégré dans la banquette inférieure, offrant ainsi une image de grande linéarité formelle. La version Yoku S Shelf prévoit une bibliothèque externe qui la rend particulièrement adaptée à toute intégration avec le salon.

DEUTSCH

Yoku S

Trotz ihres essentiellen, ausgewogenen und strengen Designs ist Yoku S einladend, warm und natürlich. Die große frontale Verglasung wird außen durch vertikale Elemente aus Naturholz belebt, die den Innenraum intimer machen und gleichzeitig zu tragenden, offenen Regalelementen werden, die eine Verbindung nach außen schaffen.

Beschreibung:

Drei verschiedene Lösungen mit drei verschiedenen Holzarten machen den Weg frei für vielerlei Projektvorschläge. Der Ofen ist in die untere Bank integriert, wodurch ein formales lineares Bild entsteht. Die Ausführung Yoku S Shelf ist mit einem Außenregal ausgestattet, wodurch sie sich besonders gut in den Living-Bereich einfügen lässt.

ESPAÑOL

Yoku S

A pesar de tener un diseño esencial, equilibrado y riguroso, Yoku S es acogedora, cálida y natural. La amplia pared de vidrio frontal cuenta en el exterior con elementos verticales de madera natural que proporcionan intimidad al espacio y se convierten al mismo tiempo en elementos de soporte para estantes que se relacionan con el exterior.

Características:

Tres soluciones estéticas diferentes declinables en tres esencias de madera distintas hacen que el proyecto esté abierto a cualquier propuesta proyectual. El volumen de la estufa está integrado en el banco más bajo ofreciendo de esta forma una imagen de gran linealidad formal. La versión Yoku S Shelf prevé una librería externa que hace que sea especialmente adecuada para integrarla en la zona de día.

РУССКИЙ

Yoku S

Несмотря на свой лаконичный, уравновешенный и строгий дизайн, сауна Yoku S вносит в интерьер уютную, теплую и натуральную нотку. Большое переднее окно снаружи отделано вертикальными элементами из натуральной древесины, которые создают внутри сауны атмосферу уединения и одновременно выполняют функцию стеллажа, облагораживая интерьер всего помещения.

Характеристики:

Возможность выбора из трех вариантов дизайна и трех видов древесины позволяет максимально персонализировать проект сауны. Каменка, интегрированная в самый низкий полоч, усиливает строгую линейность дизайна. В версии Yoku S Shelf возможна установка внешнего стеллажа, который прекрасно впишется в интерьер гостиной.

中文

Yoku S

Yoku S 采用简约而均衡的极简主义设计，同时让人感受到温暖、热情和自然。正面的大块玻璃面板在外侧带有天然木材的垂直装饰元素，令内部空间更加私密，同时可以作为外部空间的开放式搁板。

特点:

三种不同设计搭配三种不同木材，确保这款桑拿房可以满足不同的美学需求。底部长凳中整合了加热器，确保整体线条简洁、干净。Yoku S Shelf 配有外部书架，令其成为起居室的完美选择。

Yoku H

Design: _____ Marco Williams Fagioli
(Zup Design)

Yoku H è il nuovo hammam della collezione Yoku disegnata da Marco Fagioli. Oltre a mantenere un aspetto intimo e fortemente personalizzabile grazie alla libreria a giorno, diffonde una raffinata eleganza nell'incontro di materiali ricercati.

- › Due diverse soluzioni estetiche declinabili in quattro diverse combinazioni di legno e Gres permettono una perfetta integrazione in ogni tipo di ambiente.
- › Hammam con Nuvola Smart Power: la più sofisticata tecnologia esistente per la generazione del vapore.

Yoku H is the new Hammam in the Yoku collection designed by Marco Fagioli. The open bookcase creates a private space that can be customised to the customer's tastes, while the luxurious materials give it a sophisticated elegance.

- › Two different designs available in four different wood and grès porcelain combinations mean it blends in perfectly with any interior.
- › Hammam with Nuvola Smart Power, the most sophisticated technology available for steam generation.

FRANÇAIS

Yoku H
Yoku H est le nouveau hammam de la collection Yoku dessiné par Marco Fagioli. En plus de maintenir un aspect intime et extrêmement personnalisable grâce à la bibliothèque ouverte, il diffuse une élégance raffinée grâce à l'association de matériaux nobles.

Caractéristiques :

Deux solutions esthétiques différentes disponibles dans quatre combinaisons de bois et de grès permettent une intégration parfaite dans n'importe quel contexte.
Nuvola Smart Power: la technologie la plus sophistiquée existant actuellement pour la génération de la vapeur.

DEUTSCH

Yoku H
Yoku H ist das neue Hamam aus der Yoku-Kollektion by Marco Fagioli. Das offene Bücherregal sorgt nicht nur für einen intimen und hochgradig individuellen Look, sondern vermittelt zudem Eleganz durch die Kombination edler Materialien.

Beschreibung:

Zwei Lösungen mit vier verschiedenen Holz-Steinzeug-Kombinationen ermöglichen eine perfekte Integration in jede Raumgestaltung.
Nuvola Smart Power – die derzeit fortschrittlichste Technologie für die Dampferzeugung.

ESPAÑOL

Yoku H
Yoku H es el nuevo hammam de la colección Yoku diseñada por Marco Fagioli. Además de mantener un aspecto íntimo y muy personalizable gracias a la librería abierta, difunde una refinada elegancia con la combinación de materiales sofisticados.

Características:

Dos soluciones estéticas diferentes declinables en cuatro esencias de madera y gres permiten que se integre perfectamente en cualquier tipo de ambiente.
Nuvola Smart Power: la tecnología existente más sofisticada para la generación del vapor.

BodyLove H

BodyLove H fait partie du système modulaire conçu par Rodolfo Dordoni et Michele Angelini : un espace hammam aux lignes épurées, réalisé avec des matériaux de la plus haute qualité, polyvalent et compact. La cabine peut être appliquée sur des sols préexistants, pour une intégration parfaite des environnements.

Caractéristiques :

Pour la production de vapeur, BodyLove H utilise la technologie Nuvola Smart Power (contrôlable depuis l'extérieur). Composants hammam de qualité exceptionnelle : grès porcelainé Champagne ou verre à flutes, banquettes blanches en Corian®, accessoires en Teck. Finitions internes à carreler entièrement même avec d'autres revêtements pour des réalisations sur mesure.

DEUTSCH

BodyLove H

BodyLove H ist Teil des von Rodolfo Dordoni und Michele Angelini entworfenen modularen Systems. Dieser vielseitige und kompakte Hamam-Bereich mit klaren Linien wird aus höchstwertigen Materialien hergestellt. Die Kabine kann auf vorhandenen Böden positioniert und damit perfekt in den Raum integriert werden.

Beschreibung:

Für die Dampferzeugung nutzt BodyLove H die Nuvola Smart Power-Technologie (von außen inspizierbar). Hamam-Elemente von außergewöhnlicher Qualität: Steinzeug Champagne oder Ornamentglas, weiße Bänke aus Corian®, Zubehör aus Teak. Innenausführungen gänzlich und für Projekte nach Maß auch mit anderen Verkleidungen verfliesbar.

ESPAÑOL

BodyLove H

BodyLove H forma parte del sistema modular diseñado por Rodolfo Dordoni y Michele Angelini. Se trata de un espacio hammam de líneas limpias, realizado con materiales de gran valor, versátil y compacto. La cabina se puede colocar sobre suelos preexistentes, de forma que se integre perfectamente con los demás ambientes.

Características:

Para la generación del vapor, BodyLove H utiliza la tecnología Nuvola Smart Power (inspeccionable desde el exterior). Componentes hammam de gran calidad: grés porcelánico Champagne o bien vidrio ondulado, bancos blancos en Corian® y accesorios en Teca. Acabados internos completamente embaldosables también con otros revestimientos para proyectos a medida.

РУССКИЙ

BodyLove H

BodyLove H является частью модульной системы, спроектированной Родольфо Дордони и Микеле Анджелини: это хаммам, изготовленный из материалов высочайшего качества и характеризующийся универсальным, компактным и лаконичным дизайном. Кабина идеально интегрируется в любой интерьер и может быть установлена на уже имеющийся пол.

Характеристики:

В системе BodyLove H используется парогенератор Nuvola Smart Power (устанавливается снаружи и позволяет легко осуществлять осмотр и техобслуживание). Материалы высочайшего качества для хаммама: керамогранит оттенка Champagne или трубчатое стекло, белые скамейки из Corian®, аксессуары из тика. Все внутренние поверхности могут быть облицованы другими материалами по индивидуальному проекту.

中文

BodyLove H

BodyLove H 属于 Rodolfo Dordoni 和 Michele Angelini 设计的模块化系统: 这款功能全面、外形紧凑的土耳其浴室采用简洁的线条和优质的材料。该隔间可以直接安装地板上, 与房间完美融合。

特点:

在蒸汽生成方面, Body Love H 采用 Nuvola Smart Power 技术 (可从外部进行检测)。土耳其浴室采用优质材料: 香槟色炻瓷或槽纹玻璃、Corian® 材质的白色板凳, 以及柚木配件。内部可以采用全瓷砖设计或其他类型的定制墙面覆层。

Design: _____ Talocci Design

Il rito della sauna si completa con la zona doccia, accuratamente progettata nel pieno rispetto della tradizione finlandese.

› Tutta la zona sauna è rivestita in legno di Hemlock canadese, il materiale più pregiato utilizzato per le saune finlandesi.

› La struttura esterna alla sauna è disponibile in tre finiture standard o con cromie personalizzate.

› Disponibile anche nella variante Filo (senza pedana) per la massima integrazione con l'ambiente.

The sauna is completed with a shower area, carefully designed to be faithful to the Finnish tradition.

› The entire sauna area is clad in Canadian hemlock wood, the most highly prized material for Finnish saunas.

› The outside of the sauna is available in three standard finishes or with personalised colour schemes.

› Also available in the Filo model (without the platform), allowing it to fit seamlessly into its surroundings.

AIR CORNER

AIR

Air

Design: _____ Talocci Design

Air è una sauna dal design originale e contemporaneo, caratterizzata dalla sospensione delle sedute e dalla simmetria delle linee, con la stufa in posizione centrale: la leggerezza diventa il carattere dominante.

- > Le panche sospese alleggeriscono il design e consentono l'installazione sul pavimento esistente.
- > La stufa in posizione centrale fa di Air un luogo di incontro, dove rilassarsi in compagnia.
- > I piani delle panche diventano all'esterno un portasciugamani e un funzionale piano di appoggio.
- > Arredamenti realizzati in pregiato legno Aspen al naturale o termotrattato, molto resistente nel tempo.
- > Ampie superfici vetrate a tutta altezza in cristallo temperato da 10 mm.

The Air sauna is an original, contemporary design which, as the name implies, features a light and airy feel created by the suspended seating and symmetrical lines with the heater in a central position.

- > The suspended benches create a lightweight design enabling the sauna to be installed on existing flooring.
- > The centrally placed heater makes Air the ideal meeting place to relax in company.
- > The bench seats project outside, creating a handy towel holder and shelf.
- > The fittings are made of luxurious aspen wood, either natural or heat-treated for a long life.
- > Ample glass surfaces in 10mm toughened glass.

Air

Air est un sauna au design original et contemporain, caractérisé par la suspension des banquettes et par la symétrie des lignes, avec le poêle positionné au centre : la légèreté devient le caractère dominant.

Caractéristiques :

Les banquettes suspendues rendent le design plus léger et permettent l'installation sur le sol existant. Le poêle positionné au centre fait d'Air un lieu de rencontre, où se détendre en compagnie. Les mobiliers sont réalisées en bois précieux Aspen au naturel ou thermo-traité, très résistant dans le temps. Les plans des banquettes deviennent à l'extérieur un porte-serviettes et un plan d'appui fonctionnel. De grandes surfaces vitrées sur toute la hauteur en cristal trempé de 10 mm.

DEUTSCH

Air

Air ist eine Sauna im originalen und modernen Design. Sie zeichnet sich durch schwebend wirkende Sitzflächen und symmetrische Linien sowie den mittig positionierten Ofen aus: Leichtigkeit wird zum dominierenden Charakterzug.

Beschreibung:

Die schwebenden Bänke erleichtern das Design und ermöglichen die Installation auf existierenden Böden. Der mittig positionierte Ofen macht Air zu einem Ort der Begegnung, um sich in Gesellschaft zu entspannen. Das Ausstattung bestehen aus hochwertigem dauerhaft sehr resistentem Espenholz, naturbelassen oder thermisch behandelt. Die Bankflächen werden außerhalb zu einem Handtuchhalter und einer praktischen Ablage. Große Glasflächen bis zur Decke aus gehärtetem 10-mm-Glas.

ESPAÑOL

Air

Air es una sauna de diseño original y contemporáneo, caracterizada por la suspensión de los asientos y por la simetría de las líneas, con la estufa en posición central: la ligereza se convierte en su característica dominante.

Características:

Los bancos suspendidos aligeran el diseño y permiten la instalación en el suelo existente. La estufa en posición central convierte Air en un lugar de encuentro, dónde relajarse en compañía. La parte interna y las paredes están realizadas en madera Aspen de calidad, al natural o tratada térmicamente, muy resistente en el tiempo. Las superficies de los bancos se convierten, en la parte externa, en un toallero y una funcional base de apoyo. Amplias superficies de vidrio hasta el techo en cristal templado de 10 mm. Las fuentes luminosas de Led colocadas debajo de los bancos destacan la ligereza del ambiente.

РУССКИЙ

Air

Air – это сауна с оригинальным современным дизайном, в котором доминирует концепция воздушной легкости, выраженная подвешенной конструкцией лежаков, симметричными линиями и центральным расположением каменки.

Характеристики:

Подвешенные лежаки делают конструкцию более легкой и позволяют установить сауну на существующий пол. Каменка, расположенная по центру кабины, делает Air местом встречи и релаксации в компании.

Внутренняя отделка и стены выполнены из ценной и долговечной древесины литовской осины (с термообработкой или в натуральном виде).

Наружные торцы лежаков выполняют функцию держателей для полотенец и практичных полок.

Обширная площадь остекления во всю высоту фасада: закаленное стекло 10 мм.

中文

Air

Air 系列桑拿浴为原创现代设计，悬空式座椅，对称式结构线条，居中式桑拿炉：简洁轻便正是这款桑拿房的主要特点。

特点:

悬空长椅使得设计更显轻巧，并且桑拿房可以安装在已经铺好地板的地面上。居中式桑拿炉使得Air系列桑拿房成为相聚的休闲场所，人们可以在相互陪伴下休息放松。

内部及墙板选用产自立陶宛的天然或热恒温处理的白杨木材，使得此款桑拿房长久耐用。

长凳的层次在桑拿房外成为摆放毛巾或可用的背靠。

桑拿房表面大范围采用经过高温淬火处理的钢化玻璃，厚度为10mm。

Sky Corner

Design: _____ Talocci Design

Nuovo modello della linea Sky, con una superficie vetrata ancora più ampia: un vero e proprio angolo trasparente di luce e benessere.

- › Sauna certificata, realizzata in pregiato legno canadese Hemlock o Aspen Termotrattato e vetri temperati 10 mm.
- › Superficie vetrata estremamente ampia: parete frontale, porta, soffitto e parete laterale.
- › Grande versatilità, ideale per realizzazioni su misura.

A new addition to the Sky line, with more generous glass surfaces, a corner radiating light and wellbeing.

- › Certified sauna made of prized Canadian hemlock or heat-treated Aspen wood and 10mm toughened glass panels.
- › Extremely generous glass surfaces: front wall, door, ceiling and side wall.
- › Extremely versatile, ideal for made-to-measure solutions.

The Sky Corner interior can be enhanced with colour therapy and under-bench LED lighting (optional)

The larger glass surfaces emphasise the design features of this line.

Auki

Design: _____ Talocci Design

Costruita totalmente in legno pregiato di Abete di Svezia oppure Hemlock canadese senza nodi, Auki combina l'antica tradizione delle saune nordeuropee con un design moderno.

- › Sauna certificata IMQ, realizzata in legni pregiati e vetrate in cristalli temperati da 8 mm.
- › Pareti interne e esterne caratterizzate da doghe di larghezze variabili.
- › Auki si adatta facilmente alle necessità dello spazio a disposizione, anche per applicazioni su misura.

Built entirely from highly-prized Swedish pine or knot-free Canadian hemlock, Auki is the perfect blend of the ancient Scandinavian sauna tradition and up-to-the-minute design.

- › IMQ certified sauna made of highly-prized wood and 8mm toughened glass panels.
- › Inner and outer walls feature slats of variable width.
- › Auki can easily be adapted to fit the available space, also for made-to-measure solutions.

Finish: Canadian hemlock
Optional: side glass panel

Finish: Swedish pine

Die gänzlich aus hochwertigem schwedische Fichtenholz oder astfreiem kanadischen Hemlock-Holz gebaute Auki kombiniert die antike Tradition der nordeuropäischen Saunen mit modernem Design.

Beschreibung:

Sauna mit IMQ-Zertifikat, gefertigt aus hochwertigen Hölzern und Verglasungen aus gehärtetem Niederemissionsglas, 8 mm.

Die Innen und Außenwände zeichnen sich durch unterschiedlich große Dauben aus.

Auki passt sich leicht dem zur Verfügung stehenden Raum an, auch für Anwendungen nach Maß.

ESPAÑOL

Auki

Construida completamente con madera de calidad de Abeto finlandés o bien Hemlock canadiense sin nudos, Auki combina la antigua tradición de las saunas del norte de Europa con un diseño moderno.

Características:

Sauna certificada IMQ, realizada en maderas de calidad y paredes de vidrio en cristal templado de baja emisión de 8 mm.

Paredes internas y externas caracterizadas por tablas de anchuras variables.

Auki se adapta fácilmente a las necesidades del espacio a disposición, incluso en aplicaciones a medida.

РУССКИЙ

Auki

Полностью выполненная из отборной финской ели или из канадского

хемлока без сучков, Auki являет собой гармоничное сочетание традиций финской сауны и современного дизайна.

Характеристики:

Сауна сертифицирована IMQ, она изготовлена из лучших сортов древесины и закаленного стекла 8 мм с низкой эмиссионной способностью.

Внутренние и внешние стены обшиты деревянными панелями различной ширины.

Auki легко подстраивается под имеющееся пространство, а также подлежит персонализации.

中文

Auki

完全采用芬兰珍贵的云杉木或加拿大无结铁杉木制成，Auki系列展现了北欧传统古老的桑拿浴与现代设计的完美结合。

特点:

通过IMQ认证的整体桑拿房，使用珍贵的木材及经过淬火处理的低排放钢化玻璃，厚度为8mm。

内部及外部墙体可由不同宽度的木条组成，极具特色。

Auki 适用于已有空间的需求，也可根据实际情况提供尺寸定制。

La Biosauna è una sauna con livelli di temperatura contenuti tra i 50 e i 60°C e un'umidità di circa 60-70%. Grazie al vaporizzatore integrato, impostando la temperatura preferita, la stufa Bio creerà l'equilibrio perfetto fra calore ed umidità. Il sistema combinato Effe consente la scelta tra Biosauna, un percorso a metà strada fra la sauna finlandese e la natura mediterranea del bagno di vapore, o sauna tradizionale, caratterizzata da temperature fino a 100°C con bassa umidità. Il sistema combinato può essere applicato a tutte le saune di Effe.

The Bio-sauna is a sauna whose temperature ranges from 50 to 60°C with humidity between 60-70%. The built-in vaporiser allows you to set your preferred temperature and the Bio heater creates the perfect balance between heat and humidity. The combined Effe system allows you to choose between a Bio-sauna, a halfway house between the Finnish sauna and the Mediterranean nature of the steam bath, or a traditional sauna with low humidity and a temperature of up to 100°C. This combined system can be installed in all Effe saunas.

Bio-sauna

LA SCELTA DI GENERATORI DI VAPORE EFFE

YOUR CHOICE OF EFFE STEAM GENERATORS

Materiali

Vetro temperato serigrafato.
Alluminio verniciato RAL 9003.

Caratteristiche

Generatore di vapore interno.
Sistema automatico di lavaggio caldaia.
Sistema di regolazione portata acqua.
Sistema automatico di scarico acqua.
Funzione Energy Saver automatica.
Pannello di controllo touch con icone retroilluminate e indicatore del livello di temperatura.
Funzione Power Steam: sistema di diffusione vapore a ventilazione forzata.
Funzione Caldo Doccia: sistema di riscaldamento a ventilazione forzata con funzione preriscaldamento.
Vano contenitori per essenze.
Illuminazione con cromoterapia a Led RGB, 5 colori fissi, 4 cicli dinamici e luce bianca.

ECC - Effe Comfort Control

Sistema che consente di gestire a distanza il bagno turco dal proprio dispositivo, tramite l'App Effe ECC. Disponibile su iOS e Android.

ESS - Effe Sound System

Dispositivo Bluetooth per l'ascolto di musica all'interno della sauna o dell'hammam.

Materials

Screen-printed tempered glass panel.
Painted aluminium RAL 9003.

Features

Built in steam generator.
Automatic boiler cleaning system.
Water flow rate control system.
Automatic water drainage system.
Automatic energy saver function.
Touch-screen control panel with backlit icons and temperature gauge.
Power Steam Function: steam diffusion and forced ventilation heating system.
Caldo Doccia Function: unit pre-heating function with forced ventilation heating system.
Containers for essential oils.
Lighting system with Led RGB chromotherapy 5 fixed colours, 4 dynamic cycles and white light.

ECC - Effe Comfort Control

System that remotely controls the steam bath from your device, using the Effe ECC app. Available on iOS and Android.

ESS - Effe Sound System

Device with Bluetooth connection for listening to music inside the sauna or hammam.

Touch&Steam

/ steam generator /

Touch&Steam

Inseribile in ogni doccia o ambiente hammam
Touch&steam è un generatore professionale dal design elegante e leggero. Il massimo della tecnologia nella produzione di vapore.

- › Pannello di controllo touch con icone retroilluminate e indicatore del livello di temperatura.
- › Manutenzione ridotta grazie al sistema automatico di lavaggio della caldaia che minimizza l'accumulo di calcare.
- › Design elegante e compatto costituito da una lastra di vetro temperato serigrafato, spessore visibile: 3,7 cm.
- › PSF (Power Steam Function): innovativo sistema di ventilazione che minimizza la stratificazione delle temperature.

Touch&steam is a stylish, lightweight professional-standard generator that can be fitted to any shower or Hammam environment. State-of-the-art steam-generating technology.

- › Touch-screen control panel with backlit icons and temperature indicator.
- › Low maintenance thanks to the automatic boiler-cleaning system that minimises lime-scale build-up.
- › Stylish, compact design featuring a panel of silk-screen-printed toughened glass, visible thickness 3.7cm.
- › PSF (Power Steam Function): the innovative ventilation management system minimises temperature layering.

Aquasteam Smart

Una lastra di vetro curvato con comandi digitali, una fonte e una ciotola rendono Aquasteam Smart un generatore di vapore intuitivo nell'uso e perfettamente abbinabile a qualsiasi rivestimento.

- › Tecnologia Effe per la generazione del vapore: igiene, controllo del calcare e massima qualità del vapore.
- › Manutenzione ridotta e lunga durata grazie al sistema automatico di lavaggio della caldaia.
- › Design molto compatto costituito da una lastra di vetro curvato serigrafato, spessore visibile: 3,7 cm.
- › Predisposizione per collegamento a lampada con luce bianca o cromoterapia.
- › Pannello di controllo touch con icone retroilluminate e indicatore del livello di temperatura.

A curved glass panel with digital controls, a spring and a bowl make Aquasteam Smart an intuitive steam generator to use that blends perfectly with any décor.

- › Effe steam generation technology gives you maximum control over hygiene, lime-scale build-up and steam quality.
- › Low maintenance and a long life thanks to the automatic boiler-cleaning system.
- › Extremely compact design featuring a curved panel of silk-screen-printed glass, visible thickness 3.7cm.
- › Set up for connection to a white or chromotherapy light fitting.
- › Touch-screen control panel with backlit icons and temperature indicator.

Aquasteam Smart is equipped with a cool water spring operated by a practical touch-screen control. The holder for essential oils at the bottom allows you to recreate your favourite aroma therapy experience.

Nuvola Smart Power

Generatore di vapore ad alta potenza, da collocare all'esterno dello spazio hammam: la più sofisticata tecnologia esistente e la pulizia formale fanno Nuvola Smart Power un prodotto senza rivali.

- › Generatore di vapore professionale esterno, adatto per ampie cubature.
- › Prolungato funzionamento senza bisogno di manutenzione.
- › Nuvola Smart Power è adatto per applicazioni a scomparsa e si integra quindi facilmente con qualsiasi soluzione d'arredo.
- › Controllo automatico delle termoresistenze per una distribuzione di vapore uniforme nel tempo.
- › PSF (Power Steam Function): innovativo sistema di ventilazione che minimizza la stratificazione delle temperature.

A high-power steam generator, to be fitted outside the Hammam space. The most sophisticated technology in existence and its clean lines make Nuvola Smart Power an unrivalled product.

- › External professional-standard steam generator suitable for large spaces.
- › Tested for long maintenance-free operation.
- › Nuvola Smart Power has been developed for hidden installation, to blend perfectly with any interior design solution.
- › Automatic heating element control for even steam distribution over time.
- › PSF (Power Steam Function): the innovative ventilation management system minimises temperature layering.

Nuvola Smart Power

Générateur de vapeur à haute puissance, à placer à l'extérieur de l'espace hammam : la technologie la plus sophistiquée existante et la netteté formelle font de Nuvola Smart Power un produit exceptionnel.

Caractéristiques :

Générateur de vapeur professionnel externe, indiqué pour d'amples cubages.

3 000 heures de fonctionnement garanties sans besoin d'entretien

Fonction ODS (Open Door Sensor) : le générateur bloque la production de vapeur s'il relève que la porte est ouverte.

Contrôle automatique des thermorésistances pour une distribution de vapeur uniforme dans le temps.

Nuvola Smart Power est indiqué pour des solutions à encastrer et permet l'application dans des espaces réalisés sur mesure.

ESPAÑOL

Nuvola Smart Power

Generador de vapor de potencia elevada, a colocar en el exterior del espacio hammam: la tecnología existente más sofisticada y la limpieza formal convierten Nuvola Smart Power en un producto sin igual.

Características:

Generador de vapor profesional externo, adecuado para amplios espacios.

3000 horas garantizadas de funcionamiento sin necesidad de mantenimiento.

Función ODS (Open Door Sensor): el generador bloquea la producción de vapor si detecta que la puerta está abierta.

Control automático de las termorresistencias para una distribución de vapor uniforme en el tiempo.

Nuvola Smart Power es adecuado para soluciones empotrables y por tanto permite la aplicación en espacios realizados a medida.

中文

Nuvola Smart Power

高功率蒸汽发生器，需放置于土耳其浴室外部：成熟的先进技术及自动清洁功能，使得Nuvola Smart Power系列蒸汽发生器在同类产品中占据遥遥领先的地位。

特点:

适用于大范围空间的专业外置蒸汽发生器。

保证3000小时运行无需进行产品维护。

ODS开门感应功能：如果检测到蒸汽门处于打开状态，蒸汽发生器将会自动停止产生蒸汽。

自动热阻控制功能，可保证长时间使用过程中蒸汽的均匀分布。

Nuvola Smart Power 系统也适用于在墙体预埋起来，因此可以按照实际空间大小提供定制化解决方案。

WaterDream

Design: _____
Giovanna Talocci,
Marco Pallocca

La mini piscina è uno spazio di relax totale dedicato al rapporto tra acqua e corpo. Varie modalità di idromassaggio uniti a movimenti di luce colorata creano piacevoli atmosfere dedicate al benessere.

- › La mini piscina consente di mantenere l'acqua al suo interno per lunghi periodi di tempo, senza svuotarla ad ogni utilizzo.
- › Funzione Source: leggero flusso dell'acqua che parte dal fondo della vasca e genera un movimento circolare.
- › WaterDream è facilmente integrabile in qualsiasi contesto di arredo bagno grazie alla personalizzazione del pannello che nasconde il quadro comandi, posto al lato della vasca.

The mini pool is a space for total relaxation, for celebrating the water-body relationship. Its different whirlpool modes, combined with the moving coloured lights, create a pleasant atmosphere conducive to wellbeing.

- › Water can be kept in the mini pool for long periods of time, without having to empty it every time.
- › Source function: gentle water flow from the bottom of the bath which generates circular movement.
- › WaterDream can be installed in any bathroom, thanks to the customisable panel on the side of the bath which conceals the controls underneath.

WaterDream can be installed in any bathroom, thanks to the customisable panel on the side of the bath which conceals the controls underneath.

WaterSuite

得益于 WaterSuite，水成为我们确保日常身心健康不可或缺的部分。标配 Source 功能，可从浴室底部喷出柔和的水流，帮助身体进入深层放松状态并刺激血液循环。水下灯光效果提升这款优雅的多功能产品的装饰效果。

特点:

浴缸具备旋流按摩模式，以及采用 RGB LED 照明的 Blade Light 色彩疗法。WaterSuite 采用位于浴缸侧面的定制面板，并将控制按钮隐藏在面板下方，因此可以安装到任何浴室中。

È possibile ascoltare la propria musica preferita all'interno della sauna o dell'hammam utilizzando la connessione Bluetooth del proprio Tablet o Smartphone. Dotata di due casse stereo, Effe Sound System si collega automaticamente agli altoparlanti interni senza dover installare software o predisporre collegamenti specifici.

You can listen to your favourite music inside the sauna or hammam using a Bluetooth connection and your own device. The Effe Sound System, which has two stereo speakers, connects automatically to the internal speaker with no need to install any software or make special connections.

ESS
EFFE SOUND
SYSTEM

Sistema che consente di gestire a distanza il bagno turco o la sauna, scaricando l'apposita App Effe ECC (disponibile su ambiente iOS e Android) sul proprio Tablet o Smartphone. È possibile personalizzare la propria esperienza comodamente da altri ambienti della casa ed eseguire funzioni quali impostazione dell'ora di accensione, della temperatura e selezione della luce preferita. La copertura Wi-Fi nell'ambiente in cui sono inseriti il bagno turco o la sauna permette una programmazione remota da qualsiasi luogo (ufficio, auto, ecc.). Infine l'App Effe ECC permette di avere informazioni utili sull'utilizzo del prodotto: da come utilizzarli al meglio a quali sono i suoi benefici.

This system can control remotely the sauna or the steam bath. To enable it, just download the Effe ECC App (available on iOS and Android) to your Tablet or Smartphone. This makes it possible to personalise your own experience conveniently from other places in your home and pre-set such functions as switch-on time, temperature and your preferred light selection. The Wi-Fi cover in the sauna or hammam area enables you to program it remotely from almost any other location, such as your office or car. Last but not least, the Effe ECC App provides you with useful information about the product, such as how to get the best out of your sauna or your hammam and its health benefits.

ECC
EFFE COMFORT
CONTROL

PORTE E VETRATE

DOORS AND GLASS PANELS

Le speciali porte Effe per hammam sono progettate per ottenere una tenuta perfetta alla fuoriuscita del vapore, garantendo il giusto ricircolo d'aria. L'acciaio inox, l'alluminio e il vetro temperato di 8 mm di spessore rendono ogni modello molto durevole e facilmente abbinabile allo stile di ogni arredamento. Grazie alle porte Effe, anche la semplice doccia di casa può essere trasformata in un perfetto bagno turco.

The special doors created by Effe for Hammams are designed to ensure a perfect seal against the escape of steam thus ensuring proper air circulation. Stainless steel and 8mm-thick toughened glass make each model tough and long-lasting and easily adaptable to any furnishing style. Effe's special doors also enable any ordinary home shower to be transformed into the perfect Turkish bath.

Effe presenta in collaborazione con Remedia, azienda che utilizza prodotti naturali e biologici coltivati e lavorati secondo antiche tradizioni di erboristeria alchemica, una linea di fragranze per sauna e hammam che ampliano i benefici di questi antichi rituali con una dimensione olfattiva e onirica.

Effe has come together with Remedia, which uses natural organic products that are grown and processed according to ancient traditions of alchemical herbalism, to create a range of fragrances for saunas and Hammams which heighten the benefits of these ancient rituals thanks to their olfactory and almost dreamlike effect.

**PERFECT
WELLNESS
FRAGRANCES**

Acqua.

**Fluidità,
Equilibrio,
Armonia.**

Nella gioia si esprime il sorriso di Arancio dolce che culla il piacere di vivere. Le note profumate ritmano il canto dell'acqua, semplice e puro come Lavanda, pulito e cristallino come Eucalipto.

Acqua ci coccola, si prende cura di noi, ci avvicina alle emozioni più incantate, lascia spazio al bambino interiore. Ci accompagna a trovare serenità ed armonia. Il rituale diventa un momento di pace profonda.

Water.

**Fluidity,
Balance,
Harmony.**

Joy brings the smile of sweet orange which nurtures life's pleasures. The scented notes bring rhythm to the sound of water, simple and pure like lavender, crisp and clear like eucalyptus.

Water pampers us, it takes care of us, it puts us in touch with magical feelings, it brings out the child in us. It helps us find peace and harmony. The ritual becomes a moment of profound peace.

Fuoco.

**Passione,
Forza vitale,
Sistema
immunitario.**

Note agrumate danno spazio e ardore al caldo Cardamomo attorno al quale danza l'intrepido Ginepro dalle note suadenti e fortificanti. Nulla può resistere all'ingresso di Cannella dolce, calda e curativa come il sole.

Fuoco è energia, pura vita celebrata nell'ardore e nella forza. Tutto il corpo si riallinea e si appassiona. Il rituale ci ricarica e stimola la nostra forza vitale agendo sul sistema immunitario.

Fire.

**Passion,
Life force,
Immune
system.**

Citrus notes give space and passion to warm cardamom, accompanied by fearless juniper with its mellow, fortifying notes. Sweet cinnamon is irresistible, warming and healing us like the sun.

Fire is energy, pure life celebrated with passion and strength. The whole body is realigned and energised. The ritual gives us renewed energy and stimulates our life force, with benefits for the immune system.

Terra.

**Radicamento,
Corpo fisico,
Centratura,
Presenza.**

Note intense e profonde di Vetiver e Cedro avvolgono il corpo e celebrano la sua sacralità. Il suadente Patchouli acquieta la mente e dona sensualità accompagnato alla dolcezza da Benzoino e Coriandolo.

Terra ci accompagna alla sacralità del Corpo e esalta il rituale della Sauna o del Bagno Turco quando ci siamo dimenticati della nostra presenza fisica. Aiuta a riconnetterci con le esigenze del corpo e dei suoi veritieri messaggi.

Earth.

**Roots,
Physical body,
Centring,
Presence.**

Intense, profound notes of vetiver and citron envelop the body and celebrate its sacred being. Persuasive patchouli calms the mind and conveys sensuality, with benzoin and coriander adding to the sweetness.

Earth accompanies us as we explore the sacred nature of the body and enhances the ritual of the sauna or steam bath when we have forgotten our physical presence. It helps reconnect us with the needs of our body and its true messages.

Aria.

**Pensiero,
Spaziosità,
Respiro,
Leggerezza.**

Il suono di Litsea arriva da lontano e si annuncia fresco e rigenerante come il vento che spazza nubi nere. Il balsamico Alloro ne amplia il respiro e riconduce la mente alla purezza sul tintinnio della Menta.

Aria purifica la mente sovraccarica, la libera, la alleggerisce. Dilegua il peso del mentale e sostiene il respiro. Il rituale ci rigenera e ci apre a nuovi vedute.

Air.

**Thought,
Spaciousness,
Breath,
Lightness.**

The scent of litsea comes from afar, fresh and regenerating like the wind that chases away dark storm clouds. The balsamic effect of bay accentuates these notes and restores purity to the mind, accompanied by refreshing mint.

Air purifies our troubled mind, frees it, unburdens it. It lightens the weight of our thoughts and supports out breath. The ritual regenerates us and opens our mind to new horizons.

Effe è al centro di una storia che parte dalla tradizione e arriva nel futuro più innovativo. La storia è quella del benessere, di antichi riti come la sauna e il bagno turco che oggi assumono una veste contemporanea grazie a tecnologie avanzate e raffinato design. Dietro a questa evoluzione c'è un'azienda che dal 1987 ha dedicato la sua attività unicamente a questo settore, orgogliosa di offrire una produzione di bagni turchi e saune interamente italiana, dalla progettazione alla produzione.

Con questa filosofia Effe è divenuta meritatamente leader nel suo campo, conquistando la fiducia di clienti in tutto il mondo. Un punto di forza è dato dall'eccellenza delle soluzioni tecnologiche, sempre all'avanguardia che garantiscono prodotti di qualità certificata, di lunga durata, con manutenzione ridottissima e risparmio energetico.

Oltre a ricercare elevate prestazioni e funzionalità, Effe sa bene che benessere fa rima con "bell'essere", e quindi pone uguale attenzione anche all'estetica. Saune e bagni turchi sono disegnati con linee pulite, tracciate da illustri designer, spesso con grandi aperture vetrate che le trasformano in eleganti oggetti di arredamento. I materiali sono ecocompatibili, i tipi di legno sono di prima scelta e non provengono da deforestazione o da alberi in estinzione. Lo straordinario know-how di Effe si traduce in accurate soluzioni su misura.

Effe is central to a story that starts with tradition and stretches right into the most innovative future. This is a story of wellbeing, of the ancient traditions of the sauna and the Turkish bath that today's advanced technology and design excellence have clothed in a new guise. This evolution has been made possible by our company that, since 1987, has focused entirely on this sector and we are proud to offer saunas and Turkish baths that are 100% Italian, from design to manufacture.

This philosophy has enabled Effe to become the well-deserved leader in our field, winning the trust of our customers the world over. One of our strong points is the excellence of our high-tech solutions, always in the vanguard of progress with long-lasting, energy-saving products of certified quality, requiring very little maintenance.

In addition to our constant quest for high performance and practicality, we at Effe are fully aware that feeling good equates to looking good and so we take just as much care over aesthetics. Our saunas and Turkish baths feature clean lines traced by such famous designers, often with generous expanses of glass that transform them into stylish items of furniture. We use only eco-friendly materials and the wood is always top quality from reliable sources that do not cause deforestation or endanger rare trees under threat. Effe's extraordinary know-how translates into precise made-to-measure solutions.

GENERATORE DI VAPORE INTERNO

INTERNAL STEAM GENERATOR

Touch-screen control panel
Pannello di controllo touch

Built-in steam generator
Generatore ad incasso

Built-in steam diffuser
Diffusore di vapore integrato

ELEGANTE

I generatori di vapore Effe sono compatti ed eleganti: il design razionale li rende adatti all'applicazione in qualsiasi ambiente.

STYLISH

Effe steam generators are compact and stylish, designed to adapt perfectly to almost any environment and décor.

FACILE DA INSTALLARE

Effe fornisce una controcassa perfettamente organizzata, per un veloce collegamento alle tubature e alla rete elettrica.

EASY TO INSTALL

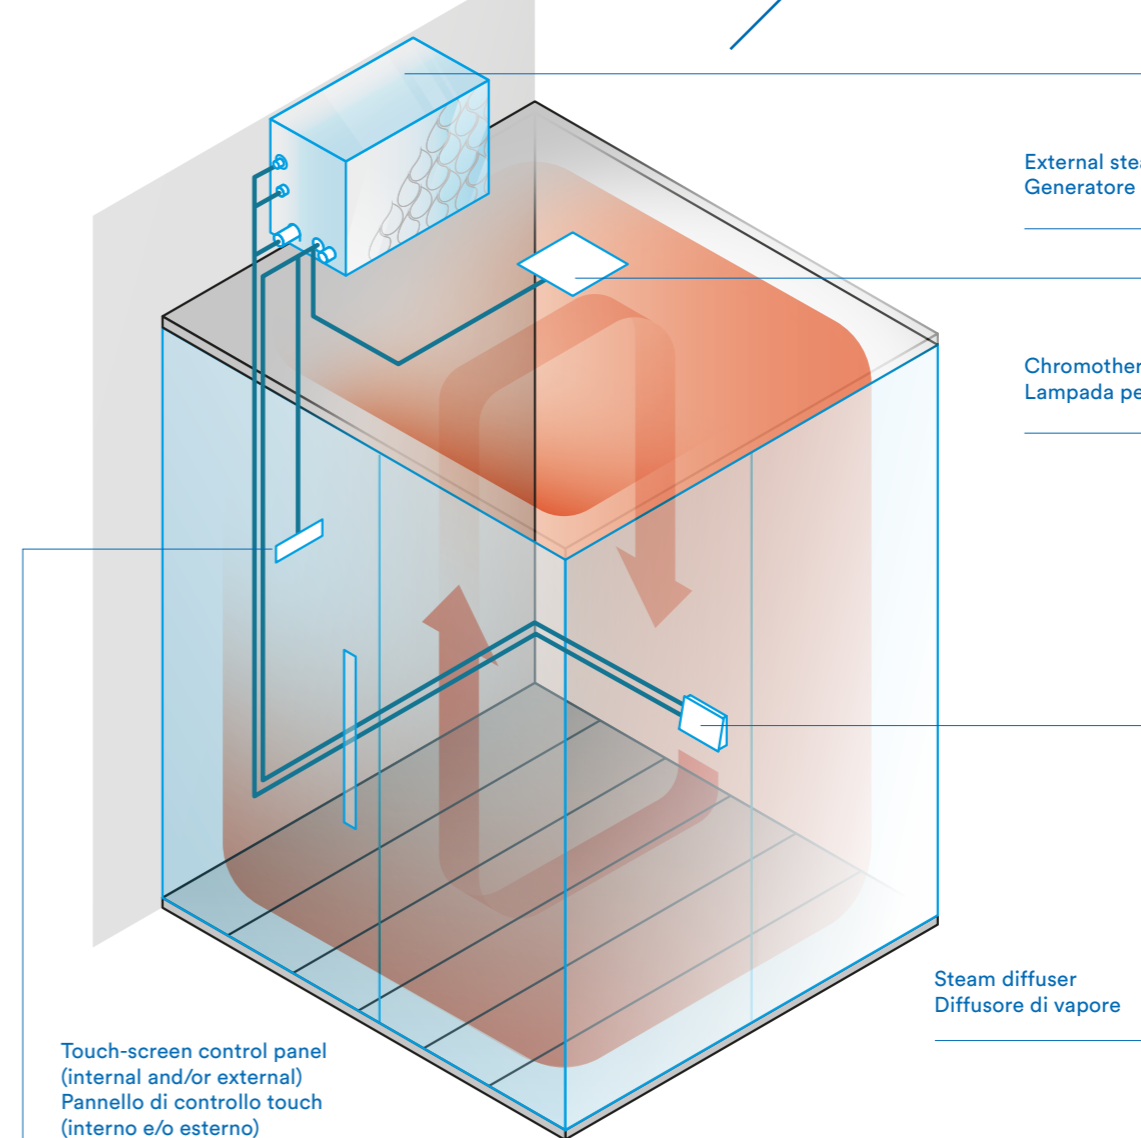

Effe supplies a perfectly designed outer casing for quick connection to the water and electrical mains.

GENERATORE DI VAPORE ESTERNO

EXTERNAL STEAM GENERATOR

External steam generator
Generatore di vapore esterno

Chromotherapy lamp
Lampada per cromoterapia

Steam diffuser
Diffusore di vapore

Touch-screen control panel
(internal and/or external)
Pannello di controllo touch
(interno e/o esterno)

POTENTE

Il generatore di vapore esterno Nuvola Smart Power permette l'utilizzo di motori più potenti e quindi l'utilizzo per spazi molto ampi.

POWERFUL

The external Nuvola Smart Power steam generator enables more powerful motors to be fitted for use in much larger spaces.

PULIZIA FORMALE

Il generatore esterno può essere installato in un vano nascosto, lasciando completa libertà nel design dell'hammam.

DESIGN FREEDOM

The external generator can be installed in a hidden space, for total Hammam design freedom.

BEST TECHNOLOGY

I nuovi modelli Smart di generatori di vapore Effe offrono le migliori prestazioni per design, tecnologia e tutela dell'ambiente.

The new Smart steam generators by Effe feature the best in design, technology and respect for the environment.

Risparmio energetico Energy Saving

1

Le sonde di controllo della temperatura regolano l'erogazione del vapore per ottenere sempre il massimo confort.

The temperature control probes regulate the emission of the steam to ensure maximum comfort at all times.

Distribuzione uniforme nel tempo dei cicli di accensione e spegnimento delle termoresistenze.

The on/off periods of the heating elements are evenly spaced.

Energy Saving Smart descaling

3

Controllo automatico e riduzione dei fenomeni derivanti da concentrazione di calcio ed altre sostanze in acqua.

It automatically checks for and reduces problems caused by the build-up of lime-scale and other substances in the water.

Risciaquo automatico finale 30 min dopo la fine dell'hammam con diluizione iniziale con acqua fredda.

Final automatic rinsing takes place 30 min after the end of the Hammam session with initial dilution with cold water.

Facilità di installazione Easy to install

2

Controcassa progettata per agevolare i processi di installazione.

The casing is designed for easy installation.

In tutti i generatori interni, uno specifico carter superiore garantisce l'anti-gocciolamento.

A special top cover is fitted on all the internal generators to prevent dripping.

Perfetta tenuta stagna della controcassa e dei generatori interni.

The casing and internal generators are perfectly watertight.

Nessun spreco di acqua No water waste

4

Diluizioni e risciacqui intermedi calcolati su reale fabbisogno.

Dilution and intermediate rinsing are based on real need.

Riempimento automatico della caldaia in base alle necessità.

The boiler is automatically filled when needed.

Monitoraggio costante del tempo di carico e scarico acqua.

The time needed to fill and drain water is constantly monitored.

Conformità ai requisiti anti-inquinamento per allaccio idrico.

Compliance with anti-pollution plumbing requirements.

Auto-configurazione elettronica Electronic self-configuration

5

Start-up automatico: la sofisticata elettronica consente di svolgere velocemente lo start-up evitando la procedura manuale.

Automatic start-up: thanks to the sophisticated electronics, start-up is quick and there is no need for the manual procedure.

Il sistema riconosce automaticamente le periferiche collegate (lampada cromo, pannello, ecc.).

The system automatically recognises any connected devices (colour therapy lamp, control panel etc.).

Vapore perfetto Perfect steam

6

Funzione Power Steam (PSF) di serie: speciale sistema di ventilazione che consente una temperatura uniforme in tutto il vano hammam.

Power Steam Function (PSF) fitted standard: a special ventilation system that avoids temperature differences inside the Hammam cubicle.

Alette orientabili per direzionare il vapore in uscita; velocità ventola configurabile; led luminoso all'uscita del vapore.

Adjustable blades to vary steam flow direction; configurable fan speed; LED lighting illuminates the steam outlet.

Doppia sonda di temperatura all'interno del diffusore di vapore.

Two temperature probes inside the steam diffuser.

Super Silent Steam: basso livello di rumorosità dell'erogazione vapore.

Super Silent Steam: silent steam generation.

Migliore manutenzione Better maintenance

7

Sistema in grado di rilevare e segnalare eventuali malfunzionamenti delle termoresistenze e della sonda.

The system is able to detect and signal malfunctions in the heating elements and probe.

Autodiagnosi: in caso di anomalia il sistema effettua una procedura di ripristino delle elettrovalvole.

Self-diagnosis: in the event of a fault, the system unblocks the valves.

Certificazione dei principali enti mondiali Worldwide certification

8

I generatori di vapore Effe sono progettati e costruiti in conformità con i principali enti di certificazione mondiali.

Effe steam generators are designed and built in compliance with the leading international certification bodies.

ELEMENTI INDISPENSABILI PER UN HAMMAM DI QUALITÀ

ESSENTIAL ELEMENTS FOR A QUALITY HAMMAM

1

DENSITÀ E TEMPERATURA DEL VAPORE

Un perfetto hammam si ottiene quando il vapore consente di raggiungere una temperatura superiore ai 40°C. Nei prodotti Effe la temperatura è programmabile in una scala che va dai 42 ai 48°C. La sapiente gestione del vapore, frutto di anni di ricerca, ottimizza l'omogeneità del calore all'interno del bagno turco.

STEAM DENSITY AND TEMPERATURE

A perfect Hammam is achieved when the steam makes it possible to reach a temperature above 40°C. In Effe products the temperature can be set on a scale from 42 to 48°C. The smart steam management system, the fruit of many years of R&D, ensures even heat distribution inside the Turkish bath.

374

2

CALCARE E IGIENE

La tecnologia esclusiva Effe, unica al mondo, consente di evitare filtri meccanici sul generatore e manutenzioni frequenti. Grazie a sistemi sofisticati, la caldaia (rigorosamente in acciaio inox) viene caricata e scaricata con acqua fredda e pulita a ogni utilizzo. Questo riduce notevolmente la necessità di interventi di pulizia e manutenzione, oltre a garantire una perfetta igiene all'interno dell'ambiente.

LIME SCALE AND HYGIENE

Exclusive Effe technology has produced a unique system without mechanical filters on the generators and no need for frequent maintenance. All the boilers are stainless steel and a sophisticated system fills and empties the boiler with clean cold water every time it is used. This notably reduces the need for cleaning and maintenance, as well as ensuring the interior environment is perfectly hygienic.

375

GESTIONE OTTIMIZZATA DEL CONSUMO ENERGETICO

Ogni generatore di vapore Effe è dotato di una funzione Energy Saver. La potenza massima del generatore viene sfruttata per portare in ebollizione l'acqua e raggiungere la temperatura impostata. Durante il funzionamento l'assorbimento viene ridotto alla metà o anche a un terzo, a seconda del modello di prodotto, pur mantenendo costante il getto di vapore.

OPTIMISED MANAGEMENT OF ENERGY CONSUMPTION

Each Effe steam generator has an Energy Saver function. The maximum power of the generator is used to bring the water to boiling point and reach the set temperature. While it is functioning the energy input is reduced to a half or a third, depending on the model, while keeping the steam flow constant.

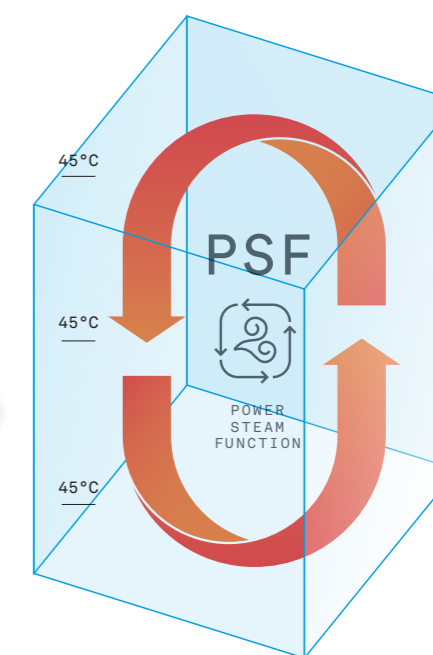

PSF: POWER STEAM FUNCTION

TRADITIONAL HAMMAM

L'innovativo sistema di gestione della ventilazione minimizza la stratificazione delle temperature all'interno della cabina. In questo modo il calore dentro l'hammam sarà uniforme sia nella parte superiore che in quella inferiore dell'ambiente, condizione indispensabile per una salutare fruizione del bagno turco.

PSF: NEW TECHNOLOGY FROM EFFE

The innovative ventilation management system minimises temperature layering inside the cubicle. In this way the heat will be distributed evenly at the top and bottom of the Hammam, ensuring maximum benefits from the steam bath.

KNOW-HOW & TECHNOLOGY

SEC Smart Energy Control

Distribuzione uniforme nel tempo dei cicli di accensione e spegnimento delle termoresistenze in modo da ottenere una diffusione costante del vapore.

Evenly spaced on/off periods for the heating elements to obtain even steam distribution throughout the session.

SBC Smart Boiler Cleaning

Diluizioni e risciacqui intermedi calcolati sul reale fabbisogno per ridurre l'accumulo di calcare e aumentare la durata della caldaia senza manutenzione.

Dilution and intermediate rinsing processes not time controlled but based on real need to reduce limescale deposits and avoid frequent boiler maintenance.

SWF Smart Water Filling

Gestione ottimizzata di riempimento caldaia, risciacqui intermedi e svuotamento. Le resistenze lavorano sempre in maniera ottimale.

Optimised management of boiler filling, intermediate rinsing and emptying process. Heating elements programmed for optimum operation.

ECC Effe Comfort Control

Il sistema è integrato nel generatore di vapore Effe e consente di gestire a distanza il bagno turco tramite l'App Effe ECC su tablet o smartphone.

This system is built into the Effe steam generator, enabling remote control of the Turkish bath from a tablet or smartphone using the Effe ECC app.

PSF Power Steam Function

L'innovativo sistema di gestione della ventilazione minimizza la stratificazione delle temperature all'interno della cabina, grazie ad una ventilazione controllata.

The innovative ventilation management system minimises temperature layering inside the cubicle by controlling ventilation.

NEW

RWF Regulating Water Flow

Il generatore può lavorare dentro un ampio range di pressione dell'impianto idrico del locale: da 0,2 bar a 10 bar.

The generator can work on a wide range of water systems with different pressures, from 0.2 bar to 10 bar.

ODS Open Door Sensor

Il sistema è in grado di bloccare automaticamente l'erogazione del vapore in caso di prolungata apertura della porta del vano hammam.

The system automatically interrupts steam distribution when the door of the Hammam is left open for a long time.

Se stai pensando di ristrutturare il bagno o devi ancora realizzarlo puoi trasformare molto facilmente il tuo box doccia in una cabina doccia con bagno turco.

Le dimensioni di un box doccia con bagno turco possono essere quelle standard; l'altezza invece non dovrebbe superare i 230 cm per non sprecare energia e perché il vapore dell'hammam tenderebbe a salire troppo. Se invece hai a disposizione più spazio, puoi progettare il tuo angolo di relax pensando al numero di persone che ne usufruiranno.

Il segreto per realizzare il bagno turco ideale a casa propria è l'utilizzo di una perfetta coibentazione della porta, in modo che il vapore sia isolato all'interno, mentre viene garantito il giusto ingresso di aria dall'esterno. Effe ha studiato una serie di porte professionali da applicare alla cabina doccia, per mantenere costante la densità del vapore e ridurre i consumi.

**TRASFORMA
LA TUA
DOCCIA
IN HAMMAM**

If you're thinking of refurbishing your bathroom, or about to build a new one, you can transform an ordinary shower cubicle into a luxury space complete with steam bath.

A shower cubicle incorporating a steam bath can still be a standard size, although the height must not exceed 230cm so as not to waste energy and because the steam in the Hammam will tend to rise too high.

**TRANSFORM
YOUR SHOWER
INTO A
HAMMAM**

Hotel Rosa Alpina - San Cassiano - Bolzano - Italy

If you're lucky enough to have a bit more room, you can plan your chill-out space for more than one person.

The secret to creating your dream steam bath at home is perfect door insulation to ensure that the steam stays inside while the right amount of air flows in from outside. Effe has designed a range of professional-standard doors that can be fitted to your shower cubicle to keep steam density constant and reduce consumption.

TRASFORMA LA TUA DOCCIA IN HAMMAM

TRANSFORM YOUR SHOWER INTO A HAMMAM

Misura lo spazio che hai a disposizione

Ogni vano può essere trasformato in hammam, basta seguire alcune indicazioni su come coibentare pareti e porte. Molto importante è definire i metri cubi destinati ad ospitare l'hammam perchè esistono differenti generatori di vapore che variano in base alla potenza.

Measure your available space

Any space can be transformed into a Hammam, just follow a few instructions for insulating walls and doors. It is very important to measure the volume that will play host to the Hammam so as to ensure the right steam generator is selected, based on its power.

Aggiungi il kit coibentazione e scegli una porta Effe per hammam

Per realizzare il bagno turco ideale è consigliata una perfetta coibentazione del vano. Le porte Effe garantiscono tenuta al vapore e un corretto ingresso e ricambio di aria.

Add the insulation kit and choose an Effe Hammam door

Proper cubicle insulation is recommended for the perfect steam bath. Effe doors provide an efficient steam seal and correct air inflow and exchange.

Scegli il generatore di vapore

Steam generators can be placed inside or outside the Hammam cubicle. You can base your choice on the available volume and also on your design preferences: Touch&Steam, Easystem and Aquasteam are stylish and easily adaptable to your own interior décor. They also have different functions that you can find out about in more detail on Page 40

Choose the right steam generator

I generatori di vapore possono essere posizionati all'interno o all'esterno del vano hammam. Scegli in base ai metri cubi disponibili, oppure anche in base alle tue preferenze estetiche: Touch&Steam, Easystem e Aquasteam sono eleganti e adattabili facilmente allo stile del tuo arredo. Hanno anche funzioni differenti, che puoi scoprire nel dettaglio a pagina 40

Completa con arredi e accessori

Effe makes it possible to personalise your shower-Hammam with a set of handy accessories: benches, seats, water springs, chromotherapy, the ESS - Effe Sound System for listening to music inside the Hammam.

Complete with furniture and accessories

Effe permette di personalizzare la tua doccia-hammam con una serie di utili accessori: panche, sedute, fonti per acqua, cromoterapia, ESS - Effe Sound System per l'ascolto della musica all'interno della cabina.

Il legno, per essere utilizzato nella sauna, deve avere precise caratteristiche di assorbimento del calore e di resistenza allo stress causato dagli sbalzi di temperatura.

Effe effettua internamente tutti i test necessari per garantire che i materiali siano adeguati per durare nel tempo e che rispettino le caratteristiche estetiche necessarie a realizzare saune perfette. Dall'hemlock canadese al tradizionale abete di Svezia, più di dieci tipologie di legno esclusivamente di prima scelta vengono selezionate da Effe e sottoposte a rigorosi controlli di qualità per offrire uno standard di altissimo livello qualitativo.

Nelle saune Effe non vengono mai utilizzati componenti plastici, poiché a temperature elevate potrebbero rilasciare sostanze nocive. I legni naturali garantiscono un ambiente sano, piacevole al tatto, che resta a lungo inalterato.

Wood to be used in a sauna must have specific properties of heat absorption and resistance to stress caused by temperature fluctuations. Effe carries out all the necessary tests in-house to guarantee the materials are capable of long life and that they meet all the aesthetic needs of a perfect sauna.

LA SCELTA DEL LEGNO PER LE SAUNE EFFE

THE CHOICE OF WOOD IN EFFE SAUNAS

Canadian Hemlock wood

From Canadian hemlock to the traditional Swedish pine, over ten different types of wood, always of top quality, are selected by Effe and subjected to rigorous quality control to ensure the highest possible quality standard.

Plastic components are never used in Effe saunas because at high temperatures they can emit noxious substances. Natural wood guarantees a healthy environment, is pleasant to the touch and is not altered over time.

Ogni articolo Effe è sottoposto a verifiche qualitative sia sotto l'aspetto estetico che funzionale. La sicurezza dei prodotti Effe è certificata a livello internazionale dai principali marchi di qualità che garantiscono il rispetto delle più severe normative vigenti. I reparti interni Effe di produzione e di Ricerca&Sviluppo, garantiscono sempre una produzione personalizzata e di alto profilo professionale.

**LE CERTIFICAZIONI
