ZC FABRICA

Nel 2010 l'i. d. Giovanni Garrone da vita a ZC Fabrica, una serie ispirata al design industriale, che coniuga una linea pulita ed essenziale ad alte prestazioni ed ad un'ottima funzionalità. Un oggetto che ci riporta all'aspetto primordiale dell'acqua per uso civile e industriale.

Numerose le possibilità di combinazione per tutti gli utilizzi, varie le declinazioni di colore per soddisfare ogni esigenza di arredamento. Senza rinunciare al comfort di bracci mobili, doccette, bocche ad altezze variabili, che alludono alle primitive forme di condizionamento domestico dell'acqua.

Il rubinetto ideale per chi considera questo accessorio un oggetto da mostrare. Presentato al fuori salone di Milano del 2011, ZC Fabrica entra oggi nella produzione Zanetti Chini rispondendo ai nuovi gusti del pubblico più attento.

In 2010 Giovanni Garrone i.d. gives birth to "ZC Fabrica", a range inspired to the industrial design combining a clean and essential line to high performances and an exceptional functionality. An object bringing us back to the primordial feature of water for civil and industrial use.

Several possibilities of combinations for all applications, three shades of colours to meet all interior designs requirements' keeping the comfort of moving arms, shower heads, taps at different heights, all of these representing primitive shapes of domestic water conditioning. The ideal tap for those who consider it an object to be shown. Introduced to the Milan "fuori salone" in 2011, Fabrica belongs now to the Zanetti Chini production meeting to the new requirements of a very careful audience.

RUBINETTO
SINGOLO IN

RUBINETTO
TUTTO IN OTTO
OPPURE OTTO

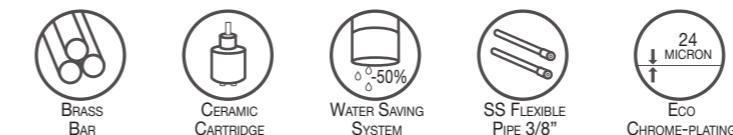

Per la fabbricazione dei nostri prodotti utilizziamo materiali e componenti di assoluta qualità, per tutelare la salute dei consumatori e dell'ambiente.

- Lingotto di ottone in lega CB7555 raffinato in Italia, conforme ai requisiti europei (UNE-EN1982)
- Barra di ottone trafiletta di provenienza italiana
- Cartucce a risparmio idrico affidabili nel tempo testate per poter resistere alle pressioni piu' elevate (30 bar) e ai colpi d'ariete (50 bar)
- Vitoni ceramici con movimento ridotto 1/4" di giro (90°) che hanno superato 500.000 cicli di apertura/chiusura in acqua fredda
- Areatori con limitatore di portata che riducono il consumo d'acqua di circa il 50 % rispetto ai tradizionali
- Flessibili inox costruiti con tubo interno in poliuretano conforme alle normative e resistente alle alte temperature
- Cromatura con uno spessore medio molto regolare (10-12 micron per il nichel e di 0.25-0.35 micron per il cromo) garantisce un'elevatissima resistenza, con una brillantezza duratura ed inalterabile.

For the manufacturing of our products we only use the highest quality materials and components, in order to protect the health of consumers and the environment.

- Brass bar in alloy CB7555 refined in Italy, in compliance with European requirement (UNE-EN1982)
- Italian extruded brass bar
- Water saving cartridges reliable in time and tested to bear high pressures (30 bar) and water hammer (50 bar)
- Ceramic headworks with reduced movement 1/4" of a turn (90 °) that have exceeded 5000 cycles of opening/closing in cold water
- Aerators with flow limiter which reduce the water consumption by approximately 50% compared to conventional ones.
- Stainless steel flexible pipe with inner polyurethane pipe compliant with the laws and resistant to high temperatures
- Chrome-plating with a very regular average thickness (10-12 microns for nickel and 0.25 to 0.35 microns for chromium) ensures a very high resistance with a long-lasting and unalterable brilliance.
